

Facilities

Facilities Worksheet – Setting Goals

Vision:				
Greening Targets	Baseline	Goals		
		Short-Term (0-1 year)	Mid-Term (1-5 years)	Long-Term (5 years +)
Green Process/ Facilities	How many new or renovated facilities are planned or underway at the park? Have you used LEED as a checklist? Do you have any buildings that have achieved certified, silver, gold, platinum ratings? How many projects are metered and monitored? How many green charrettes have been held?			
LEED – Site	What benchmarks currently exist for project site considerations? What LEED site credits are currently met in your park facilities? Which LEED site credits are most relevant or important at your park?			
LEED – Water	What benchmarks currently exist for project water considerations? What LEED water credits are currently met in your park facilities? Which LEED water credits are most relevant or important at your park?			
LEED – Energy	What benchmarks currently exist for project energy considerations? What LEED energy credits are currently met in your park facilities? Which LEED energy credits are most relevant or important at your park?			
LEED – Materials	What benchmarks currently exist for project material considerations? What LEED material credits are currently met in your park facilities? Which LEED material credits are most relevant or important at your park?			
LEED – IEQ	What benchmarks currently exist for project IEQ considerations? What LEED IEQ credits are currently met in your park facilities? Which LEED IEQ credits are most relevant or important at your park?			
Cross-Cutting Goals				
Education/ Interpretation	Are there programs, exhibits, materials on green facilities? Have any facilities compiled case study information?			
Training Needs	Have park employees attended a Sustainable Design Workshop or Charrette?			
Procurement	Do RFPS for A&E services contain sustainability criteria? Do building material specifications include EPP criteria? Is project documentation reviewed and revised due to sustainable design?
